

Amour App configuration steps

1. Download the amour app from Play store/app store
2. Open the app and log in to the app
3. Click on Wi-Fi search. This will take you to the Wi-Fi search section of your phone. Select the amour panel you want to connect.
4. The password for connecting amour panel is 'password'
5. In the configure window fill in the SSID and password of your router. If the Internet is not available, click on cancel
6. The next page of app will open up in the Manage Devices page
7. Select the panel and Control Panel user interface will open up. Now you can control your amour panel using the mobile app
8. In the manage devices page you can re-name the panel and select the icon for your room
9. In the Control Panel you can long press on any of the icons to see the automation features available for example scheduling, locking, change icon, assign inverter and configure switch
10. In the control panel you can assign the favorites/scenes by clicking on the heart icon on top right of the control panel
11. In the Manage Devices page you can use the '+' icon given on the top right of the page to access your panels saved in the Remote Log-in.
12. Remote Log-in is a functionality where you can access your panels saved under your mobile number and email id in any and as many devices. This feature is very handy when you have give access of your panel to any guest or when you want to change your handset.
